## Water Sciences - 2008

**Title:** Proceedings of International Conference on “Uncertainties in Water Resource Management: causes, technologies and consequences”

**Edited by:** Prof.D.Basandorj, Dr.D.Oyunbaatar

**Description:** This publication presents the proceedings of the International Conference on “Uncertainties in Water Resource Management: causes, technologies and consequences” held in Ulaanbaatar, Mongolia, 29 September – 3 October 2008. The conference aimed to share and disseminate knowledge, information and experiences in water resources and river basin management sciences and to promote cooperative and collaborative activities in several areas supporting the core themes of the IHP-VII (2008-2013).

In the conference 21 technical papers were presented and published in this proceedings. The range of topics covered by the papers include climate change impacts, vulnerability, adaptation and economy, sanitation, environmental protection, health, public awareness, education aspects related to water and society and some legislative concerns, methodologies, international and endorheic river basins and aquifers, extreme events which can consider as water resources management issues. **Title:** Asian Pacific FRIEND: Rainfall Intensity Duration Frequency (IDF) Analysis for the Asia Pacific Region

**Edited by:** Trevor M. Daniell and Guillermo Q. Tabios III

**Description:** This publication presents the different methods of analysis for their rainfall intensity-duration-frequency (RIDF) curves, to learn from the various participating countries how their RIDF analyses are conducted. Extreme rainfall data from their participating countries is provided in the publication so that comparison of the various methods used in RIDF analysis and subsequently estimating design rainfalls could be made.
